

TRUTHLENS AI FORENSICS

Forensic Verification Deepfake Analysis Report • Generated: 2026-06-28 11:24:44

Video Analysis Metadata	
Job Identifier:	aec5e362-485a-408e-a099-2144d56728a0
Target Video File Name:	Cute Fruit Babies Eating _ AI Generated Funny F
Total Frames Sampled:	63
Frames with Detected Faces:	17
Suspicious Frames Flagged:	9

ANALYSIS
VERDICT: FAKE

Confidence: 51.4% (AI
Splicing/Face-Swap)

Temporal Confidence Trend & Probability Distribution

Suspicious Frame Forensic Breakdown (Top 5)

Frame #0 (Timestamp: 0.00s) — Deepfake Probability: 100.0%

Forensic Signature Analysis:
Boundary inconsistency. Model attention was drawn to outer facial edges, suggesting splicing borders or face blending artifacts.

Frame #65 (Timestamp: 2.17s) — Deepfake Probability: 100.0%

Forensic Signature Analysis:
No anomalies detected.

Frame #250 (Timestamp: 8.33s) — Deepfake Probability: 100.0%

Forensic Signature Analysis:
Model attention concentrated in this region. Attention map indicates localized skin texture anomalies, artificial color blending, or high-frequency neural network artifacts.

Frame #300 (Timestamp: 10.00s) — Deepfake Probability: 100.0%

Forensic Signature Analysis:
No anomalies detected.

Frame #305 (Timestamp: 10.17s) — **Deepfake Probability: 100.0%**

Forensic Signature Analysis:

Boundary inconsistency. Model attention was drawn to outer facial edges, suggesting splicing borders or face blending artifacts.
