

TRUTHLENS AI FORENSICS

Forensic Verification Deepfake Analysis Report • Generated: 2026-06-28 11:39:51

Video Analysis Metadata	
Job Identifier:	e2bc8c2a-0c6b-4c6d-acb8-91a86b652f05
Target Video File Name:	Top 5 David Attenborough Moments BBC Earth
Total Frames Sampled:	5881
Frames with Detected Faces:	10
Suspicious Frames Flagged:	7

ANALYSIS
VERDICT: Not AI

Confidence: 78.3%
(Authentic Facial
Movements)

Temporal Confidence Trend & Probability Distribution

Suspicious Frame Forensic Breakdown (Top 5)

Frame #15585 (Timestamp: 623.40s) — AI Probability: 66.6%

Forensic Signature Analysis:
Model attention concentrated in this region. Attention map indicates localized skin texture anomalies, artificial color blending, or high-frequency neural network artifacts.

Frame #10665 (Timestamp: 426.60s) — AI Probability: 61.8%

Forensic Signature Analysis:
Boundary inconsistency. Model attention was drawn to outer facial edges, suggesting splicing borders or face blending artifacts.

Frame #10685 (Timestamp: 427.40s) — AI Probability: 57.4%

Forensic Signature Analysis:
Boundary inconsistency. Model attention was drawn to outer facial edges, suggesting splicing borders or face blending artifacts.

Frame #10680 (Timestamp: 427.20s) — AI Probability: 57.3%

Forensic Signature Analysis:
Boundary inconsistency. Model attention was drawn to outer facial edges, suggesting splicing borders or face blending artifacts.

Frame #10730 (Timestamp: 429.20s) — **AI Probability: 56.2%**

Forensic Signature Analysis:

Model attention concentrated in this region. Attention map indicates localized skin texture anomalies, artificial color blending, or high-frequency neural network artifacts.
